ABHISHEK PANDA

Senior .NET Architect | Engineering Lead | Azure Cloud | ML.NET

hello.abhishekpanda@gmail.com +91-8917549065 Bengaluru India abhishekpanda.com

abhishekpanda abhishekpanda

EXECUTIVE SUMMARY

- **Technical Architect** & **Engineering Lead** with **10.8+ years** of experience building high-availability, cloud-native **.NET microservices** and event-driven systems on Microsoft **Azure**.
- **Led** global teams in large-scale platform modernization, achieving 20–40% performance improvements and measurable cloud cost optimization.

PROFESSIONAL EXPERIENCE

OriginX Labs Pvt. Ltd. (formerly Cropxon Innovations Pvt Ltd) 08/2025 – 03/2026 | Bangalore, India (Remote)

Principal Solution Architect

Products: **Proxinex** | **Cropxon**

- Architected Azure-based **.NET Core microservices platforms** powering AI-native SaaS systems for multi-model LLM orchestration and agritech intelligence use cases.
- Designed scalable **multi-tenant cloud architecture (AKS, Azure SQL, Service Bus, Redis, APIM)** enabling secure, event-driven, high-availability deployments.
- Built **multi-agent / Agentic AI frameworks** integrating open-source and commercial LLMs with RAG pipelines, vector databases, contextual memory, and tool-calling workflows.
- Developed distributed AI orchestration layers combining **.NET backend services with Python-based AI components**, ensuring resiliency, observability, and cost optimization.
- Implemented ML pipelines using **ML.NET and Azure Machine Learning** for model evaluation, predictive analytics, and domain-specific intelligence automation.

Tech Stack: C#, .NET Core, Azure AKS, Azure Functions, Azure SQL, Redis, Service Bus, Docker, Kubernetes, ML.NET, Azure ML, Vector Databases, REST APIs, OAuth2, JWT, Open & Closed Source LLMs, vLLMs, HuggingFace

Solera (Smart Drive Systems Pvt. Ltd.) 01/2023 – 08/2025 | Bangalore, India

Engineering Lead (.NET) | Technical Architect

Automotive / Fleet Management – *GFP SmartDrive (Enterprise Platform)*

- Architected and developed Azure-based **.NET Core microservices** (AKS, Azure Functions, Service Bus, Azure SQL, APIM) for a high-availability fleet management platform supporting real-time telemetry and operational dashboards (Angular 18).
- Designed and implemented **event-driven, distributed systems** with enterprise-grade API security (OAuth2, JWT, rate limiting), while contributing hands-on to core backend services and performance optimization.
- Integrated **Machine Learning components using ML.NET and Azure Machine Learning** for predictive analytics, dispatch optimization, and intelligent fleet insights.
- Led DevSecOps automation (Azure DevOps, Docker, Kubernetes, Terraform), established observability (Azure Monitor, Application Insights), and mentored 18+ engineers while driving ~20% performance improvement and cloud cost optimization.

Tech Stack: C#, .NET Core, Azure AKS, Azure Functions, Azure SQL, Service Bus, APIM, Angular, ML.NET, Azure ML, Docker, Kubernetes, Terraform, CI/CD.

Accion Labs 08/2022 – 12/2022 | Bangalore, India

Principal Software Engineer

Dell Technologies : *Dell Customer Service AI Chatbot Platform*

- Architected a **cloud-native .NET Core microservices platform** to support scalable chatbot orchestration and backend integration.
- Designed conversational workflows integrating **Machine Learning-based intent detection and entity extraction** models.
- Built API-driven bot services integrating with Dell's CRM, order management, warranty lookup, and ticketing systems.

Wells Fargo 05/2020 – 07/2022 | Hyderabad, India

Assistant Vice President / Lead Engineer

Wealth & Investment Management Technology (WIMT)

- Architected and governed **14+ mission-critical brokerage platforms** in a regulated banking environment, designing event-driven microservices using **.NET Core, Kafka, and Azure Functions** for trade processing, analytics, and real-time operational dashboards (Angular 12).
- Built secure, scalable **Azure cloud infrastructure (AKS, Azure SQL, Service Bus, Key Vault, Entra ID)** while establishing enterprise architecture governance, security baselines, and compliance standards; contributed hands-on to distributed backend services and reliability improvements.
- Led 24x7 production operations, SLA governance, and zero-downtime deployment strategies (blue-green, canary), improving infrastructure efficiency by **40%**, optimizing cloud costs, and mentoring 10+ engineers across global teams.

Tech Stack: C#, .NET Core, Kafka, Azure AKS, Azure Functions, Azure SQL, Azure Service Bus, Key Vault, Entra ID, Angular 12, Docker, Kubernetes, CI/CD.

Virtusa 08/2018 – 05/2020 | Doha, Qatar

Associate Consultant

Qatar Airways – PAX Disruption Management System (GCC) |
Citi Bank – Financial Workflow Automation Platform

- Architected and modernized **Azure-based .NET Core microservices** replacing legacy monolithic systems for large-scale aviation and banking platforms, enabling modular, scalable, and resilient enterprise architectures with Angular-based real-time dashboards.
- Designed secure, production-grade API ecosystems using **Azure API Management (APIM), OAuth2, JWT, and policy governance**, aligning with GCC aviation security standards and financial compliance requirements.
- Built **event-driven and serverless architectures (Azure Functions, Service Bus)** to support real-time passenger disruption workflows and financial processing pipelines across regulated environments.
- Contributed hands-on to backend development, secure API integrations, SQL Server optimization (30–40% performance improvement), and workflow automation reducing manual operational overhead.

Tech Stack: C#, .NET Core, Azure API Management (APIM), Azure Functions, Azure Service Bus, SQL Server, OAuth2, JWT, Angular 8, REST APIs, Microservices, Event-Driven Architecture.

Conduent (formerly Xerox Business Services) 07/2015 – 07/2017 | Bangalore, India

Software Engineer

METLIFE – Healthcare / Insurance Systems
Bank of America (Merrill Lynch) – Financial Workflow Automation

- Developed scalable **.NET Framework-based RESTful APIs and enterprise modules** supporting policy, claims, billing, underwriting, and financial workflow automation across healthcare and banking domains.
- Built secure backend services using **ASP.NET Web API, Entity Framework, ADO.NET**, and OAuth-based authentication, implementing structured logging, exception handling, and audit-compliant frameworks to enhance system reliability.
- Designed SQL Server stored procedures, indexing strategies, and performance tuning techniques, improving transaction throughput by **30–40%**, while contributing to modular service-oriented architecture initiatives.
- Participated in early modernization efforts by migrating selected components from **.NET Framework to .NET Core 1.x**, enabling cross-platform compatibility and improved performance; delivered Angular-based UI modules and supported Azure-hosted deployments with CI/CD using TFS and Git.

Tech Stack: C#, .NET Framework 4.x, .NET Core 1.x (early adoption), ASP.NET Web API, Entity Framework, ADO.NET, REST APIs, SQL Server, Microsoft Azure (App Services – early exposure), AngularJS / Angular 2+, OAuth, JSON, TFS, Git, Logging & Monitoring Frameworks.

TECHNICAL SKILLS

Backend & Frontend Architecture

- **Backend Architecture :** C#, .NET Core, ASP.NET Core, Entity Framework Core, RESTful APIs, gRPC, GraphQL, Microservices, Kafka, SQL Server, PostgreSQL
- **Frontend Architecture :** Angular (Angular 8–18), TypeScript, RxJS, REST API Integration

DevOps & Infrastructure

Git & GitHub | Azure DevOps | GitHub Actions | GitLab CI | Docker | Kubernetes (AKS) | Helm | Terraform (Infrastructure as Code) | Argo CD (GitOps)

Architecture & Design

Microservices Architecture, Event-Driven Systems, Domain-Driven Design (DDD), Saga & Outbox Patterns, High Availability & Distributed Resilience (Retry, Circuit Breaker), API Governance & Policy Management

AI/ML & Distributed Systems

LLM Integration (Open & Closed Source), RAG Architecture, Vector Embeddings & Semantic Retrieval, ML.NET Pipelines, Azure Machine Learning, Distributed AI Orchestration Multi-Agent & Tool-Calling Workflows

Cloud & Platform Engineering – Microsoft Azure (Primary)

AKS (Container Orchestration), Azure Functions (Serverless), APIM (API Governance), Service Bus & Event Grid (Event-Driven Messaging), Azure SQL & Cosmos DB (Cloud Data Platforms), Key Vault & Entra ID (Security & Identity), Azure Monitor & App Insights (Observability), Azure DevOps (CI/CD & Infrastructure Automation)

Methodologies & Practices

Agile/Scrum, CI/CD, DevSecOps, Infrastructure as Code, Secure SDLC, Cloud Migration Strategy, Performance Optimization

AWARDS

Employee of the Year (2021) 08/2021
Wells Fargo

Employee of the Month (May 2024) 05/2024
SOLERA

EDUCATION

B.TECH - Computer Science & Engineering 04/2010 – 05/2014 | Odisha
Government College Of Engineering | BPUT , Odisha
